June, 2023

Dear Potential Honors Science Students and Parents/Guardians,

You are about to embark on a whole new and exciting science experience. Being in an Honors Science course is unique in that the curriculum spirals quickly and most topics require application of skills you have previously learned in order to find success. We are hopeful that a summer review will be helpful in preparing you for the transition you will experience in September.

Your Summer Assignment is composed of skills needed to start your year successfully in your upcoming Honors Science course. It is highly recommended that all students complete the relevant assignment over the summer. The 2023 Summer Assignment for each Honors Science course can be downloaded from the links below:

- [Honors Biology Summer Assignment](#)
- [Honors Chemistry Summer Assignment](#)
- [Honors Physics Summer Assignment](#)

Choose the assignment from the course you will be enrolled in for SY 2023-2024. For example, if you are going into 10<sup>th</sup> grade Honors Chemistry, you should click the Honors Chemistry Summer Assignment. Additionally, please complete the following acknowledgement survey: [Summer 2023 Honors Science Assignment Acknowledgement Form](#)

Your Honors Science teacher will review and ensure understanding of these topics when we return to school in September. Following that, you will be given a diagnostic to assess your level of mastery. Understanding these topics is important and will allow for reference to this packet throughout the course. A pdf copy of each of the review packets are also available on the website.

We look forward to your enrollment, effort, and success in your Honors Science course for the year 2023-2024. If you have any questions, please contact the Science Department Chair, Ms. Pritchard at [jpritchard@pway.org](mailto:jpritchard@pway.org).

Sincerely,  
Your Honor Science Teachers at Piscataway High School
